Deluxe Hydrotherapy Pools

*More comfort,  
more choices,*

*for better patient care . . .*

Hydrotherapy utilizes the soothing properties of warm water immersion to relax the patient and to help ease patient discomfort and anxiety. Immersion in water has many effects that are beneficial to the patient including:

- ◆ Total immersion produces buoyancy which creates a hydrodynamic lift, reducing gravitational pull.
- ◆ A body in water weighs only a fraction of what it does on land. This decreases muscular tension and allows the patient to maintain positions that might not be possible on land. The decrease in tension can also cause an increase in oxytocin and endorphins, creating a euphoric effect.
- ◆ Hydrostatic pressure equalizes the pressure on the body below the water surface which helps to reduce pain.
- ◆ Patient demand has increased the use of hydrotherapy. The use of pools such as the Aqua-Eez pool is growing rapidly. Offering hydrotherapy to your patients expands their choices, giving them more control over their experience. Offering hydrotherapy allows you to enhance and augment patient services without major remodeling or recurring expenses.
- ◆ The buoyancy of the water and width of the pool allow patients to easily change to different positions such as the knee-chest, seated, squatting and four foot stand.
- ◆ Water reduces the strain on perineal muscles and increases elasticity.

*"Adding hydrotherapy provides another option . . . to allow women the choice to labor in the manner that they see fit, and to set the pace in their birth experience. We have seen our tub labors increase threefold every year since we began our hydrotherapy program."*

— Clinical Nurse Manager  
Major Urban Hospital

## Aqua-Eez pool meets Goals of Hydrotherapy

Pool with trapeze and towel grip option

### Needs of the caregiver:

- ◆ Fast exit if necessary. Moveable pool needs 80 seconds drainage time until door may be opened.
- ◆ Fast filling and draining of the pool.
- ◆ Easy and exact water temperature control.
- ◆ Easy to reach the pelvic area (accessibility from all sides, custom designed toe kick area for table stand while leaning over pool, V-shaped seat with opening underneath the perineal area, assistance from the front while entry door stays open with water level still at a comfortable height for mother).

### Needs of the patient:

- ◆ Easy entry and exit of pool (entry door).
- ◆ Spacious pool with enough room to move around and change positions.

### Needs of other hospital personnel:

- ◆ Prevention of cross contamination.
- ◆ Easy to clean and maintenance-free.
- ◆ Cost savings with the design of the moveable pool. All rooms can be water ready without any major renovation expenses.

**Pool dimensions 43.5" W x 73" L x 36" H**  
**Water capacity: 145 gallons**

The design of Aqua-Eez pools has evolved according to feedback from care providers. Our proactive design engineering provides maximum benefits to patients and caregivers.

*The three removable doors are one of the most important features of this next generation pool. These removable doors allow the caregiver total access to the patient. They also allow the patient easy entry and exit.*

### **The Aqua-Eez\* pool features:**

- ◆ Three removable panel doors
- ◆ Hand grips and foot rests—essential for bracing and support
- ◆ Clean water air gap for water supply protection
- ◆ Water level drops below door in 80 seconds for patient egress
- ◆ 20-minute turn around time for cleaning
- ◆ Moveable or stationary model
- ◆ Thermostatic temperature controls
- ◆ Insulation for heat retention
- ◆ Seating for patient, partner and caregiver
- ◆ Ergonomic patient seat has specially designed back support and V shape for perineal access
- ◆ Cushioned headrest (removable)
- ◆ Trapeze with sky hook towel grip (optional)
- ◆ Depth allowing total immersion of patient

*\*patent pending*

*The use of jets can create serious cleaning and disinfecting concerns for hospital staff and for patients. Aqua-Eez pools do not contain any jets. The use of jets has not been documented to improve or add to the benefits of hydrotherapy. The elimination of jets can reduce cleanup and turnaround time by up to 75%.*

*Aqua-Eez pools are available in moveable and stationary models. This allows the hospital maximum flexibility. Both models have an internal filling and draining system. They do not require additional garden type hoses or buckets to empty and fill. The moveable model connects easily to existing sink plumbing. Six spring-loaded wheels allow pool to be easily moved from room to room. Total pool width is approximately 44 inches and the pool will fit through any regulation size hospital door.*
